CAPABILITY STATEMENT

zCore Group (zCG) is a leading IT and management consulting firm specializing in data-driven solutions for Federal Agencies, led by military veterans and composed of experienced professionals with diverse backgrounds in computer science and engineering.

CORE COMPETENCIES

Our military culture emphasizes discipline, teamwork, and mission-driven thinking.

Software Development	Professional Services	Strategic Planning
DevOps	Technology	Data Analytics	Innovation

zCG has a strong track record of:

- Building web and mobile applications for private and federal projects
- Implementing CI/CD strategies with testing for rapid development
- Helping federal agencies transition financial data to modern frameworks
- Setting up DevOps architecture for GovCloud and private cloud offerings
- Incorporating Human Centered Design approaches to software development

- Delivering data-driven solutions to reduce fraud, waste, and abuse
- Developing and implementing mature enterprise risk management programs
- Supporting integration of critical business processes
- Providing advanced predictive modeling and analytical consultation
- Supporting Outreach & Stakeholder Engagement efforts
- Enabling end-to-end paperless claims processing

DIFFERENTIATORS

Veteran-Led
zCG's Veteran-led leadership and operational support forge a strong connection and deep empathy with the VA's goals and objectives.

VA Experience
zCG's insider perspective and understanding of the VA enable effective navigation, anticipation, and tailored solutions.

Acquisition Strategies Experience
zCG's expertise in acquisition strategies, seamless contractor integration, and VA's processes ensure efficient project execution and successful outcomes.

Deep VA Knowledge
zCG possesses a comprehensive understanding of VA's architecture, business processes, and legacy systems, ensuring that zCG brings relevant and up-to-date experience.

PAST PERFORMANCE

Department of Veterans Affairs

zCG is converting legacy VA financial data into the new iFAMS (Momentum) system, ensuring a seamless and secure transition.

zCG led efforts to identify solutions, analyze data, facilitate requests, develop policies and procedures, implement training, and provide ongoing operational support to prevent fraud.

Private Sector

zCG helped a global advisory firm develop business architecture, requirements, and technology strategies, leading to impactful solutions for clients, including the VA and reinforcing the firm's trusted partnership.

Health IT

zCG collaborated with a Top 10 Health IT provider to develop IT strategies for Federal Agencies, leading to enhanced efficiency, innovation, and effective solutions.
